

ALEXANDER

Quick Start Guide

Congratulations on the purchase of your Alexander watch. This wristwatch was made to the highest standards of Swiss watchmaking and has been crafted from the finest materials available.

If cared for and maintained, your watch will provide you with years of reliable and excellent service.

Welcome to the world of Alexander!

GENERAL INFORMATION

Your watch is water resistant. Water resistance is an indication of your timepiece's ability to withstand water at an indicated depth in static water.

We do not recommend immersing your wristwatch in water unless it is rated at 200 meters water resistance or greater.

Every Alexander timepiece is fitted with a Sapphire crystal. This crystal is extremely durable and scratch resistant. However, due care should still be taken not to knock the crystal against sharp or protruding surfaces.

SERVICE

If your timepiece indicates that it is quartz, it will be powered by a battery. Battery life is dependant on usage, especially if excessive use is made of features such as a chronograph (where applicable).

We recommend that you service your watch every 3 to 5 years or have it serviced during a battery replacement. For quartz watches (battery powered), service usually involves only a battery change and/or gasket change to ensure water tightness.

LEATHER STRAPS

If your watch is fitted with a leather strap, due care should be taken not to subject the watch to moisture or liquid. The more the strap is subjected to moisture and everyday wear, the shorter its lifespan. Leather straps worn under normal conditions should last between 6 months and 2 years.

Push button B

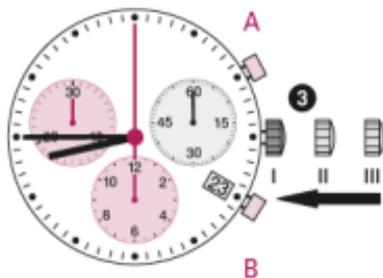

CALIBER 5030.D

Setting the time

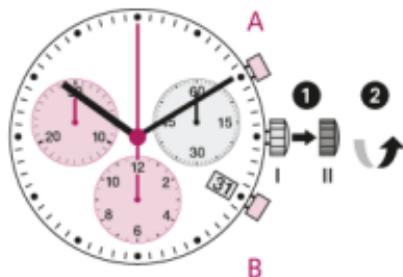

- 1*** Pull out the crown to position III (the watch stops).
- 2** Turn the crown until you reach the correct time **8:45**.
- 3*** Push the crown back into position I.

Please note:

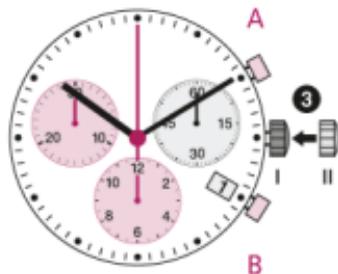

* In order to set the time to the exact second, **1** must be pulled out when the second hand is in position «60». Once the hour and minute hands have been set, **3** must be pushed back into position I at the exact second.

CALIBER 5030.D

Setting the date (quick mode)

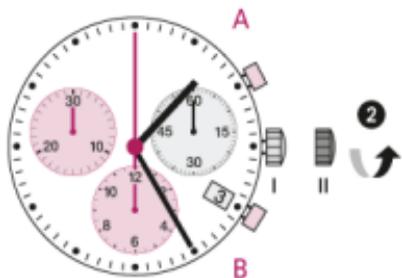

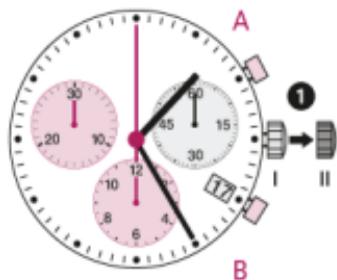

- 1 Pull out the crown to position II (the watch continues to run).
- 2 Turn the crown until the correct date **1** appears.
- 3 Push the crown back into position I.

Please note:

During the date changing phase between approx. 9 PM and 12 PM; the date must be set to the date of the following day.

CALIBER 5030.D

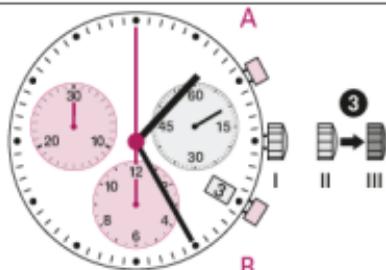

Setting the date/time following a battery change

Example:

- Date / time on the watch: **17** / 1:25 AM
- Present date / time: **4** / 8:30 PM

- 1** Pull out the crown to position II (the watch continues to run).
- 2** Turn the crown until yesterday's date appears **3**.

CALIBER 5030.D

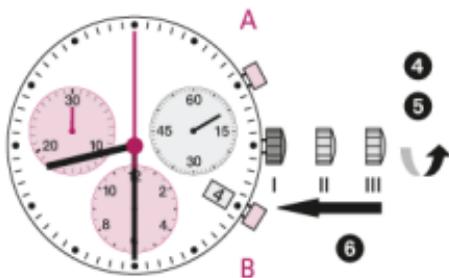

3* Pull out the crown to position III (the watch stops).

4 Turn the crown until the correct date **4** appears.

5** Continue to turn the crown until the correct time 8:30 PM appears.

6 Push the crown back into position I.

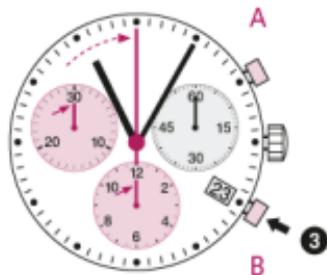

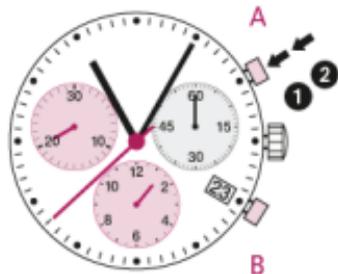

Please note:

* To set your watch to the exact second, please refer to the chapter entitled «setting the time».

** Please observe the AM/PM clock rhythm.

CALIBER 5030.D

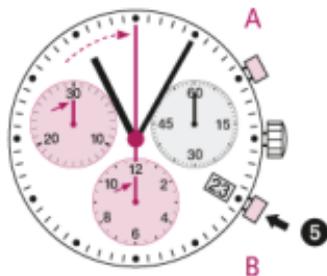

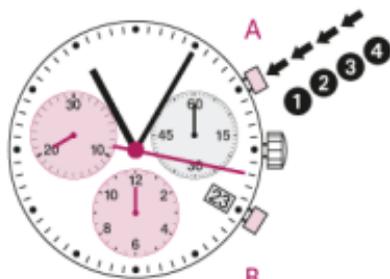

Chronograph: Basic function

(Start / Stop / Reset)

Example:

- 1 Start:** Press push-button **A**.
- 2 Stop:** to stop the timing, press push-button **A** once more and read the chronograph hands: **1h / 20min / 38 sec.**
- 3 Zero positioning:**  Press push-button **B**. (The chronograph hands will be reset to their zero positions.)

CALIBER 5030.D

Chronograph: Accumulated timing

Example:

- 1 **Start:** (start timing)
- 2 **Stop:** (e.g. **15 min 5 sec** following 1)
- 3 **Restart:** (timing is resumed)
- 4* **Stop:** (e.g. 5 min 12 sec following 3)
= **20 min 17 sec**

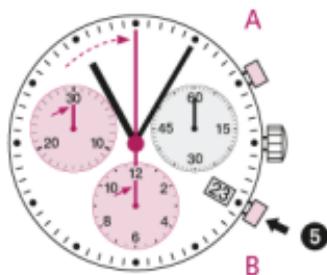

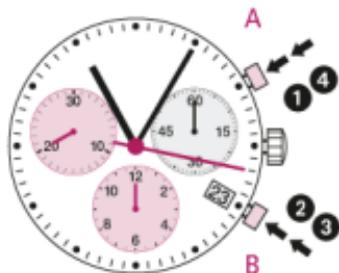

(The accumulated measured time is shown)

- 5 **Reset:** 
The chronograph hands are returned to their zero positions.

Please note:

* Following 4, the accumulation of the timing can be continued by pressing **push-button A**
(Restart / Stop, Restart / Stop, ...).

CALIBER 5030.D

Chronograph: Intermediate or interval timing

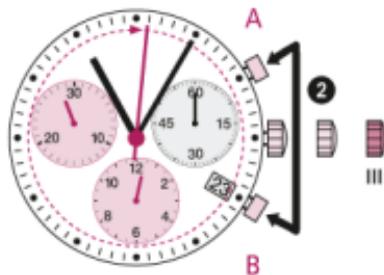

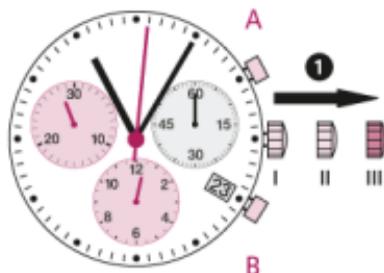

Example:

- 1 Start:** (start timing)
- 2 Display interval:**
e.g. **20 minutes 17 seconds** (timing continues in the background)
- 3 Making up the measured time:**
(The chronograph hands are quickly advanced to the ongoing measured time.)
- 4 Stop:** (Final time is displayed)
- 5 Reset:** 
The chronograph hands are returned to their zero position.

Please note:

* Following **3**, further intervals or intermediates can be displayed by pressing **push-button B** (*display interval / make up measured time, ...*).

CALIBER 5030.D

Adjusting the chronograph hands to zero position

Example:

One or several chronograph hands are not in their correct zero positions and have to be adjusted (e.g. following a battery change).

- 1 Pull out the crown to position **III** (all chronograph hands are in their correct or incorrect zero position).
- 2 Keep push-buttons **A and B** depressed **simultaneously** for at least 2 seconds (the second counter hand rotates by 360° → corrective mode is activated).

CALIBER 5040.F

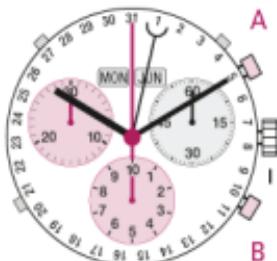

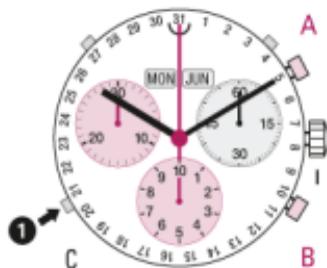

Setting the time

- 1** * Pull out the crown to position II (the watch stops).
- 2** Turn the crown until you reach the correct time **8.45**.
- 3** * Push the crown back into position I.

Please note:

* In order to set the time to the exact second, **1** must be pulled out when the second hand is in position «60». Once the hour and minute hands have been set, **3** must be pushed back into position I at the exact second.

CALIBER 5040.F

Setting the date (quick mode)

Example after a change of month:

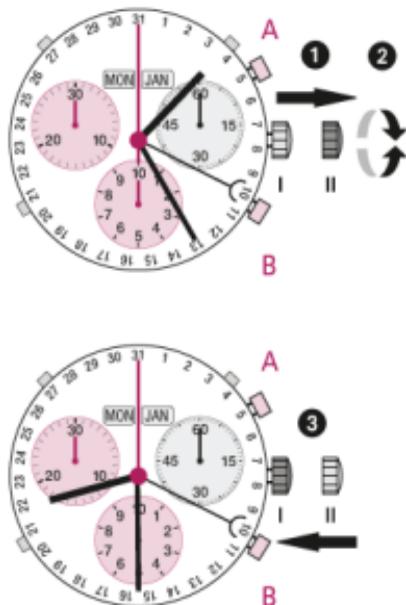

- Date on watch: 31
- Current date: 1

- 1 Press the corrector C once to adjust the date 1 day forward.

Please note:

The date for the following day must be set during the date changing phase between approx 9:00 PM and 00:20 AM.

CALIBER 5040.F

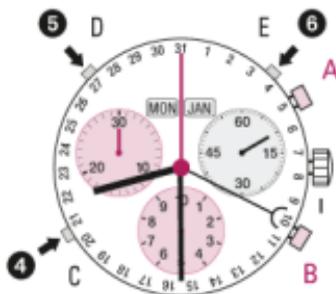

Setting the time, date, day of week and month

Example:

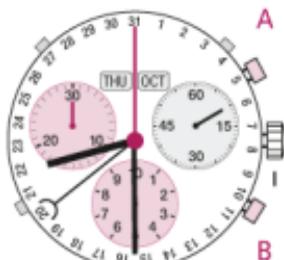

- On the watch: 10/MON/JAN/1:25 AM
- Current: 20/THU/OCT/8:30 PM

- 1*** Pull out the crown to position II (the watch stops).
- 2**** Turn crown until the current time is shown.
- 3*** Push crown to position I (watch continues to run).

CALIBER 5040.F

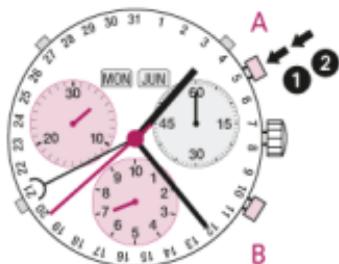

- 4 Press the corrector **C** to gradually advance the date hand.
- 5 Press the corrector **D** to gradually advance the day of week.
- 6 Press the corrector **E** to gradually advance the month.

Please note:

- * To set your watch to the exact second please refer to the chapter entitled «Setting the time»
- ** **Please observe the AM/PM clock rhythm**

CALIBER 5040.F

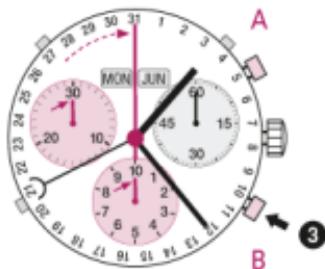

Chronograph: Basic function

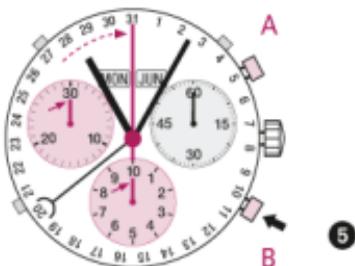

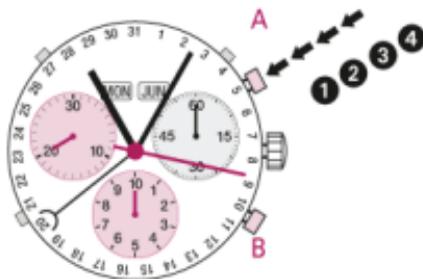

(Start / Stop / Reset)

Example:

- 1 Start:** Press push-button A.
- 2 Stop:** to stop the timing, press push-button A once more and read the chronograph counters:
4 min / 38 sek / $\frac{7}{10}$ sec
- 3 Zero positioning:** 
Press push-button B.
(The chronograph hands will be reset to their zero positions.)

CALIBER 5040.F

Chronograph: Accumulated timing

Example:

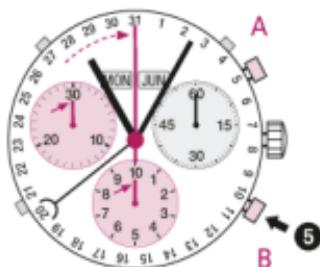

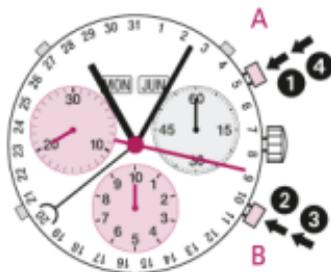

- 1 **Start:** (start timing)
- 2 **Stop:** (e.g. 15 min 5 sec following 1)
- 3 **Restart:** (timing is resumed)
- 4* **Stop:** (e.g. 5 min 12 sec following 3)
= 20 min 17 sec
(The accumulated measured time is shown)

- 5 **Reset:**
The chronograph hands are returned to their zero positions.

Please note:

* Following 4, the accumulation of the timing can be continued by pressing **push-button A**
(Restart / Stop, Restart / Stop, ...).

CALIBER 5040.F

Chronograph: Intermediate or interval timing

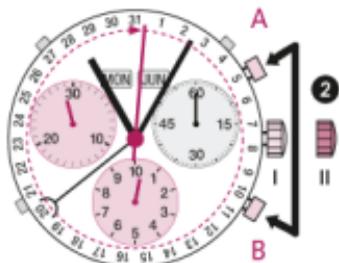

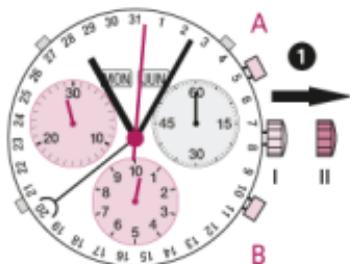

Example:

- 1 Start:** (start timing)
- 2 Display interval:**
e.g. **20 minutes 17 seconds** (timing continues in the background)
- 3 Making up the measured time:**
(The chronograph hands are quickly advanced to the ongoing measured time.)
- 4 Stop:** (Final time is displayed.)
- 5 Reset:**
The chronograph hands are returned to their zero position

Please note:
